Action Taken Report 2021-22

- The majority of students have expressed appreciation for ICT-based learning methods. In response, faculty are encouraged to integrate advanced ICT tools such as multimedia resources, digital collaboration platforms, and virtual simulations into their teaching. This initiative aims to enhance engagement and enrich the educational experience for students.
- Faculty are encouraged to provide online links to recorded lectures for each subject, facilitating better access to course materials outside of class hours and supporting student learning at their own pace.
- Responding to student aspirations for career readiness, the college is committed to organizing additional Placement Camps. These events will provide students with opportunities to engage directly with potential employers, participate in mock interviews, and develop essential employability skills.
- Recognizing the value of holistic development, the college will actively promote and support student involvement in a variety of extracurricular activities. These include sports, cultural events, community service initiatives, academic clubs, entrepreneurship programs, and leadership workshops, aiming to cultivate well-rounded individuals.
- To address infrastructure-related concerns raised by students, the college will prioritize improvements in library facilities, laboratory equipment, IT infrastructure, and accessibility to study resources. These enhancements are crucial to providing a conducive learning environment that supports academic success.
- To enhance student support and academic guidance, mentorship programs will be introduced. Faculty members and senior students will serve as mentors, offering personalized advice, career guidance, and emotional support to students throughout their academic journey.
- Faculty are encouraged to explore and implement innovative teaching methodologies such as flipped classrooms, project-based learning, and interdisciplinary approaches. These methods aim to foster critical thinking, creativity, and practical application of knowledge among students.
