Action Taken Report 2022-23

- Following an analysis of student feedback, it was noted that a small percentage expressed dissatisfaction with syllabus completion. Consequently, all teachers have been instructed to strictly adhere to the syllabus timeline. They are authorized to conduct additional lectures, arrange guest lectures, and offer remedial classes as necessary to ensure comprehensive syllabus coverage and effective learning outcomes.
- Analysis of student feedback revealed that the majority appreciate ICT-based learning. In response, teachers are motivated to integrate advanced ICT techniques and tools into their lectures. This includes utilizing multimedia resources, digital collaboration platforms, and virtual simulations to enhance engagement and enrich the educational experience.
- Teachers are encouraged to provide online links to recorded lectures for each subject. This initiative aims to facilitate better understanding and accessibility of course materials for students, supporting their learning outside of traditional classroom settings.
- Responding to student feedback on career readiness, the college administration is committed to organizing more Placement Camps. These camps will facilitate opportunities for students to interact with prospective employers, participate in mock interviews, and enhance their employability skills.
- Recognizing the importance of holistic development, the college will promote and encourage student participation in extracurricular activities. These activities include sports, cultural events, community service initiatives, and academic clubs, fostering a well-rounded educational experience.
- The college administration will implement a robust feedback mechanism to gather continuous insights from students. Regular surveys, focus group discussions, and suggestion boxes will be utilized to assess teaching effectiveness, curriculum relevance, and overall student satisfaction. Actionable feedback will be used to drive continuous improvement in educational practices and student support services.
- In response to student feedback on infrastructure, the college will prioritize upgrades to facilities and resources essential for effective learning. This includes improving library facilities, upgrading laboratory equipment, enhancing IT infrastructure, and ensuring adequate access to study materials and technological support for all students.
